

iMovie Tips

Discuss Filming Techniques with Your Students

- minimize movement and shaking
- practice zooming in and out
- practice eye contact with camera
- Learn or memorize part; avoid
“reading” (it’s boring!)

More Filming Tips...

- *re-film* mistakes instead of editing out
- film *away* from other students to avoid background noise
- Edit *music and sound effects* carefully (sound works BEST for segments in which people are *not talking*, and/or during transitions)

Making the Movie

- preview “Flip clips” before importing to iMovie
- preview “Event” clips before dragging to “Project”
- preview finished movie before exporting to desktop
